

CONSTRUCTION MANAGEMENT

Our extensive knowledge of the construction process

allows us to implement construction management systems that safeguard the project. We manage contracts and documentation, identify cost savings, and recommend the best the market has to offer. Throughout the construction process we use our extensive industry knowledge to make optimal decisions and take actions to benefit the project as a whole.

We promptly review documents for constructability issues, determine pretender estimates and advise of potential cost savings, ensuring you gain maximum contract efficiency.

Vital to any successful project is the people behind it. Our team have significant industry experience, employing them with the skills to address any project specific challenges that might arise. In addition to proposing an optimized internal qualified team, we recommend and hire qualified industry trades. A central point of communication maximizes the process by filtering input from project sources and ensuring the right information gets to the right people in a timely manner to achieve seamless integration.

As your commercial interior construction manager, we have the knowledge and expertise to oversee and audit the work done by all project teams, thereby minimizing the chance of defective work, poor workmanship and/or schedule variances. We implement a construction management system that keeps the project running smoothly, on-time and within budget.
